

Dear ATEL Communications:

I would like to thank you for the exceptional service you provided in assisting us with different options for our Internet and phone service. You provided us with different plans from several vendors then working with us to decide the best fit for us. Your project management from pre installation to post installation was excellent. The follow through provided after the install to make sure we were being charged the correct rates was very impressive. We did come across some billing issues but your team worked to resolve them to our satisfaction. We have been able to show substantial savings on both voice and Internet without decreasing the service. I would recommend ATEL Communications to anyone looking to evaluate phone equipment, lines and Internet services.

Sincerely,

Sandy Albro
Vice President of Operations and Technology
